SOURCE Izgrev.WEATHER FORECASTS FOR 4 OCTOBER - 3 NOVEMBER

4 October 1950. Colder and moist maritime air will enter the country from the northwest during the day, causing increasing cloudiness; brief showers will fall in many places before evening. In the morning and especially in the afternoon, moderate to strong northwest winds.

5 October 1950. Light fog in the morning along the Black Sea. Scattered variable cloudiness during the day over most of the country, more pronounced in the morning in the northeast half of the country and in the afternoon over the mountainous regions. Maximum temperature, 19-24 degrees [all degrees in centigrade].

6 October 1950. Light fog in the morning along the Danube and the Black Sea coast and in basin areas. Predominantly sunny during the day over most of the country, with variable cloudiness, more pronounced over the mountains. Low northwest winds. Maximum temperature, 19-23 degrees; in the southernmost border areas, near 25.

7 October 1950. Sunny during the day over most of the country, with variable cloudiness, more pronounced in eastern Bulgaria. Maximum temperature, 20-22 degrees. Low to moderate winds: northeast in eastern Bulgaria and northwest in western Bulgaria.

8 October 1950. Light frost in the early morning in the basin areas in southwest Bulgaria and the western half of the Danubian tableland. Light fog will form in the morning, which will be dispersed by the sun. Sunny during the day, with high clouds coming from the west. Light winds, becoming moderate during the day, changing progressively to east winds. Maximum temperature, 18-20 degrees.

10 October 1950. Light fog in the morning along the Danube and the Black Sea coast and in basin areas. Light frost will form in the higher basin areas. Predominantly sunny during the day over most of the country with the appearance of thin, high clouds from the west, which will increase in the afternoon and then decrease. Slight, (along the Black Sea, moderate) predominantly northeast winds. Maximum temperature, 18-22 degrees.

11 October 1950. Light haze in the morning in basin areas. Sunny during the day, with scattered high clouds locally. Slight winds. Maximum temperature, 20-24 degrees.

12 October 1950. Light fog in the morning along the Danube and the Black Sea coast, and haze in basin areas. Sunny during the day in eastern Bulgaria, with scattered high clouds; high clouds will predominate in western Bulgaria, more pronounced in the afternoon. Slight to moderate winds, predominantly southeast. Maximum temperature, 18-23 degrees.

13 October 1950. Light rain will fall in northern Bulgaria before midnight, and in scattered places in northern Bulgaria and along the Black Sea during the day. Moderate winds: northwest in western Bulgaria and northeast in eastern Bulgaria. Minimum temperature, 6-9 degrees; maximum, 17-19.

14 October 1950. Considerable cloudiness during the night in northeast Bulgaria and along the Black Sea; in the rest of the country the cloudiness will diminish, with clearing and slackening of winds in places in western Bulgaria. Minimum temperature: in basin areas and in the highlands of western Bulgaria, near 4 degrees below zero; along the Black Sea, near 4 degrees above zero; and in the rest of the country, between 1 below and 2 above zero. Scattered variable clouds during the day throughout the country, more pronounced in the afternoon in northeast Bulgaria and along the Black Sea, where light rain will fall locally. Moderate winds: north in northeastern Bulgaria and along the Black Sea, and northwest in the rest of the country.

15 October 1950. Scattered variable clouds will predominate during the day over the entire country, more pronounced over the mountainous regions of western Bulgaria and the Black Sea. Moderate to strong northwest winds. Maximum temperature, 12-17 degrees.

17 October 1950. Light fog in the morning along the Danube and the Black Sea coast and in basin areas. Sunny during the day, with scattered low clouds along the Black Sea coast. Slight to moderate winds, predominantly east. Maximum temperature, 16-18 degrees.

18 October 1950. Sunny during the day with high scattered clouds coming from the west, more pronounced in northwest Bulgaria and in the afternoon. Slight, becoming moderate northwest winds around noon. Maximum temperature, 20-24 degrees.

19 October 1950. The advance of cool and moist air from the northwest will continue. Under its influence, the weather will be cloudy throughout the country. Light rain will fall during the night in many places in northwest Bulgaria, and during the day in many places in northern Bulgaria and locally in western Bulgaria. Moderate northwest winds. Minimum temperature, 6-10 degrees; maximum, 16-20.

20 October 1950. Moist and comparatively cold air will continue to move into the country from the northwest. Under its influence, the weather will continue windy and generally very cloudy, with rainfall in many places, mainly in the northeast half of the country, and with snow on the high peaks. More pronounced temporary scattering of clouds locally in western Bulgaria around noon. Minimum temperature, 6-10 degrees; maximum, 10-15.

21 October 1950. Clear during the night over most of the country. Minimum temperature: in basin areas, between 3 degrees below zero and 1 degree above zero; in the rest of the country, 2-4. Frost will form after midnight in closed basin areas. Light fog will form in the morning along the Danube and the Black Sea coast and in basin areas, becoming heavier after sunrise. Sunny during the day, with variable, mainly high clouds, more pronounced along the Black Sea coast and, in the afternoon, in western Bulgaria. Slight to moderate northwest winds. Maximum temperature, 14-20 degrees.

22 October 1950. Sunny during the day with scattered clouds, mainly in northeast Bulgaria. Moderate to strong west winds. Minimum temperature, 2-3 degrees below zero; maximum, 17-19 above zero.

24 October 1950. Clear and calm during the night. Minimum temperature in basin areas, between 3 degrees below zero and zero. Frost will form after midnight in closed basin areas and in river valleys. Light fog in the morning along the Danube and the Black Sea coast and in basin areas, becoming heavier after sunrise. Sunny during the day, with thin high clouds coming from the west. Slight to moderate northwest winds. Maximum temperature, 16-18 degrees.

25 October 1950. The advance of moist air from the southwest will continue. Under its influence, the weather in western Bulgaria will be cloudy, with light rain falling locally in the southwest parts of the country. In eastern Bulgaria, scattered but considerable cloudiness, predominantly medium and high. Slight winds. Minimum temperature, 4-6 degrees; maximum, 13-17.

26 October 1950. Continued cloudy throughout the country, with rainfall in many places, mainly during the night and in the afternoon; snow on the high peaks. Moderate, (in isolated places, strong), predominantly southeast winds. Minimum temperature, 4-7 degrees; maximum, 11-15.

27 October 1950. Under the influence of moist Mediterranean air moving from the southwest, the weather in almost the entire country will be predominantly cloudy; rain will fall in many places, mainly in northeast Bulgaria. Predominantly southwest winds, moderate to strong during the night and slight to moderate during the day. Minimum temperature, 7-12 degrees; maximum, 13-18.

28 October 1950. A small, comparatively cool air mass will enter northwest Bulgaria during the night, and will bring showers in many places and a slight drop of temperature. In the rest of the country, the weather will continue warm and very cloudy, with local showers. Minimum temperature: in places north of the mountains and in the eastern regions, near 15 degrees; elsewhere, 5-10. Maximum temperature: in northwest Bulgaria, near 12 degrees; in places north of the mountains and in eastern Bulgaria, near 23; elsewhere, 15-20.

29 October 1950. Extremely variable cloudiness during the day throughout the country, more pronounced in eastern Bulgaria in the morning and in western Bulgaria in the afternoon. Moderate west winds. Minimum temperature: in northwest Bulgaria, 0-3 degrees below zero; in the rest of the country, 5-7 degrees above zero. Maximum temperature: 15-18 degrees.

31 October 1950. Continued very cloudy throughout the country, with rainfall in many places. Continued strong, predominantly east winds. Minimum temperature: along the Black Sea and in many places north of the mountains, near 11 degrees; in the rest of the country, 4-7. Maximum temperature: in northeast Bulgaria and along the Danube, 12-14 degrees; in the rest of the country, 14-18.

1 November 1950. Continued cloudy throughout the country, with rainfall in many places. Moderate to strong east winds. Minimum temperature, 8-10 degrees; maximum, 13-15.

2 November 1950. Continued cloudy and cold throughout the country, with rainfall in many places. Snow fall on the high peaks. Moderate (in northeast Bulgaria and along the Black Sea coast, strong), northeast winds. Maximum temperature: in northern Bulgaria and the Sofia plain, 4-10 degrees; in the rest of the country, 10-15.
